SQUARE BALER

www.abollo.com.tr

The **ABOLLO SQUARE BALLER** is a machine that collects grass, clover , wheat, barley and similar crops harvested in the field and compresses them as stalk or straw and binds them by a rope. The most common and useful one is baling machine in the form of a rectangular prism. This makes transportation, storage and use much easier. The power required to operate the machine is taken from the shaft of the tractor. With the aid of a double acting hydraulic piston lifting system on the pickup part, it easily moves up and down to include the whole product in the bale. The collector height can be adjusted from the side of the driver. The proprietary balanced crank and piston system allows both the operator and the tractor to remove undesirable vibrations and improve working conditions. The machine is equipped with a hydraulic pick-up system. It is equipped with overload-resistant bale press cabinet. Can operate with a 30 Hp tractor power. Collects the surface of the area perfectly.

Technical Dimensions		MODEL
		TY-SB160
Working Width	cm	160+3
Bale Length (Adjustment)	cm	40-120
Bale Dimension	cm	36×46
Grass Bale Weight	kg	20-35
Daily Capacity	pcs	2000-3000
Knotter	-	Double
Knotter type	-	Twine
Transport Lenght	cm	507
Transport Width	cm	575
Total Height	cm	180
PTO Rotation	rpm	540
Tractor Power	hp	35-95
Left Tire Size	-	11.5/80-15,3 6 PR
Pick Up Adjustment	adj.	Hyd
Draw Bar Adjustment	adj.	Hyd
Total Weight	kg	1880
